EDUCATION

PES UNIVERSITY

- MCA CGPA - 8.5

2024- 2026

YUVARAJA'S COLLEGE

- BCA CGPA - 8.52

2021-2024

SKILLS

Frameworks:

- Flutter
- Node JS
- Angular
- LangChain
- SvelteKit
- React
- Tensorflow JS
- LangGraph

Backend Services:

- Firebase
- Supabase

Web Languages:

- HTML
- JavaScript
- CSS
- TypeScript

Languages:

- C
- Python
- C++
- Java

Database:

- Mongo DB
- MySQL

EXPERIENCE

• Internship at Terra Web Solutions: (React, Angular and Wordpress)

- 4 Months

During my final semester of Master of Computer Applications (MCA), I commenced a four-month internship at Terra Webs Solutions, where I gained practical experience in developing real-world websites for clients. This role involves utilizing technologies such as React, Angular, and WordPress, and hosting these websites on Hostinger. I am currently actively engaged in this internship.

• Internship in ATEU Softwares: (HTML,CSS and JS)

- 4 Months

During my final semester of my Bachelor of Computer Applications (BCA), I completed an internship at ATEU Softwares, where I focused on HTML, CSS, and JavaScript. During this time, I developed several small games utilizing these technologies. For 3D games, I incorporated THREE.js.

- <https://github.com/samu4803/ATEU-Internship.git>

• Freelancing a Website for the company D R Technologies: (Flutter and Firebase)

- 5 Months

After completing my Bachelor of Computer Applications (BCA), I engaged in various freelance projects, including the development of a single-page web application for a 3D company named D R Technologies. This project was executed using Flutter and was successfully hosted with the assistance of Firebase.

CERTIFICATES

- **Flutter & Dart – The Complete Guide [2023 Edition]**

- <https://drive.google.com/file/d/1aZgfgDJjnUx4-66D3wnPGozO4gvrdMv6/view?usp=sharing>

- **NodeJS – The Complete Guide (Mvc, REST APIs, GraphQL, Deno)**

- https://drive.google.com/file/d/1ePJTGswNezwRLiER9_qOEnNavuvsrtmA/view?usp=sharing

PROJECTS

- **Chatbot using agents: (Langchain, Python and SvelteKit)**

The current Final Semester MCA Project, "MentorBot," is being built with a focus on developing a chatbot using LangChain and LangGraph technologies. Its aim is to alleviate lecturer workloads by providing AI-driven online mentorship and facilitating streamlined student report submissions. The frontend is constructed using SvelteKit, and the agent is hosted on Render.com.

- **Tic Tac Toe using Hand-Pose Detection model: (Angular, Tensorflow JS and MongoDB)**

Developed a second-semester project utilizing the Angular framework to create a hand gesture-based Tic Tac Toe game for two users. Implemented a Hand-pose detection model from TensorFlow.js to accurately detect players hand positions in front of the camera, enabling real-time interaction and block marking within the game.

- <https://github.com/samu4803/Tic-Tac-Toe-.git>

- **Chrome extension for Pesu website (HTML, CSS, JS)**

Developed a collaborative project during the second semester aimed at enhancing student resources. This initiative enabled users to download lecture slides from the PESU website with a single click and merge them into a single PDF document, optimizing accessibility and efficiency for personal and student use.

- https://github.com/samu4803/pesu_slides_extractor.git

- **CODE ALCHEMY Mobile Application(Flutter and Firebase)**

Developed a mobile application for the BCA final year project utilizing the Gemini API to convert code from one programming language to another, as well as to explain or debug given code. The application is built using Flutter, with Firebase employed for authentication and database management.
